

AI ADVANTAGE PROGRAMME

GAIN A COMPETITIVE ADVANTAGE IN NINETY DAYS.

NO VENDOR LOCK IN

We take the roadmap and first win from your AI Quick Start and turn it into multiple AI improvements across your business — saving time and money as soon as they're live.

▲ WHAT IT IS

Think of it as a quarter well spent. Over ninety days we implement the improvements worth making first, then build and introduce them one by one — with a demo each week so you see progress as it happens.

No big risky overhaul, no surprises. Just practical wins that compound.

▲ WHY OWNERS CHOOSE EHE

We bring together a start-up mentality, AI venture-building experience, operational know-how and senior AI delivery — all for a fixed price.

The result is what counts: time back, lower costs, better margins, less risk, happier staff and a smoother experience for your customers.

You retain control and ownership of everything we build. Your code, your data, no lock-in.

▲ SEE WHAT AI CAN ACTUALLY DO

Most owners know AI matters. Few have been shown what it could do in their own business. We walk you through the real opportunities in plain English, so you spot what's worth doing and what isn't. Every business is different — we'll identify what makes most sense for yours. AI deployments can also seriously enhance your business valuation.*

■ THE INVESTMENT

90 days. One fixed price, agreed up front.
£20,000–£45,000, scoped entirely to your priorities.

▲ WHAT THAT MIGHT LOOK LIKE

Automated onboarding — a full-day client onboarding now runs itself in under an hour.

Smarter reporting — your weekly management report pulls itself together, ready first thing Monday.

Streamlined operations — repetitive back-office tasks get handled automatically, freeing your team.

Integrated data — information trapped across systems, visible from a single dashboard.

AI-assisted sales — respond to leads faster, quote more quickly, spend less time on admin.

▲ WHAT YOU GET

Transparency. Clear visibility of the time, cost and productivity gains achieved.

Multiple working improvements. Live in your business, sequenced to pay back fastest or transform most.

Regular demos. See each improvement iterating before we move on to the next.

Handover & training. So your team stays confident and the value doesn't walk out the door.

A costed next-step plan. What to tackle next as part of our ongoing partner programme.

WHAT'S NEXT When this programme pays off, the natural next step is an **Embedded AI Partner** — ongoing monthly capability that keeps your business moving and your competitors behind.
