

AI QUICK START PROGRAMME

START MAKING PRODUCTIVITY SAVINGS IN FOUR WEEKS.

...OR YOUR MONEY BACK

We explore where AI will save your business time and money, then guarantee to build one working fix in less than four weeks.

▲ WHAT IT IS

A low-risk, fixed-price first step. We pick one real problem in your business, build a working fix, and leave a clear plan of what's worth building next. You finish with a strategy on where AI will impact your business most **and** something functional to improve productivity — not just a slide deck.

▲ WHY OWNERS CHOOSE EHE

We bring together a start-up mentality, AI venture-building experience, operational know-how and senior AI delivery — all for a fixed price.

The result is what counts: time back, lower costs, better margins, less risk, happier staff and a smoother experience for your customers.

You retain control and ownership of everything we build. Your code, your data, no lock-in.

▲ SEE WHAT AI CAN ACTUALLY DO

Most owners know AI matters. Few have been shown what it could do in their own business. We walk you through the real opportunities in plain English, so you spot what's worth doing and what isn't. Every business is different — we'll identify what makes most sense for yours. AI deployments can also seriously enhance your business valuation.*

■ THE INVESTMENT

A fixed £10,000. Researched, scoped and delivered within four weeks. Fixed scope, fixed price, no surprises.

▲ WHAT THAT MIGHT LOOK LIKE

Onboarding & sales ops — a client onboarding that took a full day now takes under an hour.

Automated quoting — a complex quote that once needed half a day now takes 10 minutes.

Internal knowledge — staff get instant, accurate answers from your own documents and policies.

Automated reporting — your weekly management report builds itself, ready first thing Monday.

SaaS consolidation — data trapped across systems, unified in a single dashboard.

▲ WHAT YOU GET

Practical strategic review. A transparent assessment of where AI can truly drive value in your business.

A working AI fix. One concrete, live improvement — such as faster quoting or reduced admin — deployed in your environment.

Commercial roadmap. A short, actionable plan for what to do next, prioritised by commercial return.

Team adoption. Training and capability transfer so your staff are confident using the new solution.

WHAT'S NEXT When the first win pays off, the natural next step is the **AI Advantage Programme** — a quarter of practical improvements across the business.
