

EMBEDDED AI PARTNER PROGRAMME

MAKE AI PART OF YOUR DNA.

SCALE UP OR DOWN

Senior product, strategy, AI and engineering capability, plugged into your business and your business goals. Anywhere from five days a month, and change it as your priorities change.

▲ WHAT IT IS

Your own senior AI team, without the payroll. Experts on hand when you need them: to advise, to build with you, or to build for you. Each month we work inside your business: reviewing workflows, mapping opportunities, shipping quick-win automations and keeping your technical strategy and roadmap current.

One embedded senior team. No recruitment, no ramp-up, no waste.

A CTO/CAIO when you need one. Straight, board-level technology advice, without the full-time hire.

▲ WHY CLIENTS CHOOSE EHE

We bring together a start-up mentality, AI venture-building experience, operational know-how and senior AI delivery, month after month.

The result is what counts: time back, lower costs, better margins, less risk, happier staff and a smoother experience for your customers.

You retain control and ownership of everything we build. Your code, your data, no lock-in.

▲ SENIOR JUDGEMENT, ON TAP

AI moves fast, and hiring senior AI people is slow and expensive. We put that judgement inside your business instead, so you take advantage of each new wave of AI as it arrives, not a year later. Every decision, build and fix gets the same senior quality bar, explained in plain English.

■ THE INVESTMENT

Anywhere from five days a month. £4,200 agreed up front, matched to the days you choose. Flex up or down as your priorities change.

▲ WHAT THAT MIGHT LOOK LIKE

Workflow review — we sit with your team, find the friction and put a cost on it.

Opportunity mapping — a prioritised list of what AI should do next, ranked by commercial return.

Quick-win automation — small improvements built and live within the month, saving time straight away.

Technical strategy — senior answers on models, tools, security and build-or-buy decisions.

Roadmap creation — a living plan, updated monthly, so next quarter is never a guess.

▲ WHAT YOU GET

A named senior team. Product, strategy, AI and engineering capability that gets to know your business inside out.

A monthly plan. Your days pointed at the work worth doing first, agreed with you.

Working improvements. Quick wins shipped and iterated every month, live in your business.

Straight answers. Senior judgement on every AI decision, in plain English.

A roadmap that stays current. So you always know what is next, and why.

WHAT'S NEXT When one of your improvements is ready to become a real product, the natural next step is a **Scalable Product Build** — a production-grade build from the same team.
